RE: Omission of Outdoor Education (OE) from General Senior Subjects List, Ministry of Education

Thank you for the opportunity to comment on NCEA proposed changes. We don't usually comment on proposals that sit outside our mandated remit of advocating for the preservation and enhancement of the sports fish and game birds that we manage. However, on this occasion we would like to take this opportunity to voice our concerns.

We are concerned about the proposed changes to remove outdoor education from the senior school general subject list and making it a vocational-only subject. We understand that if OE becomes vocational only that students would not be able to use the subject towards gaining University Entrance.

We believe this will result in considerably fewer students taking the subject and result in many schools not offering the subject in the future. This also forces students into decisions about vocational or academic pathways at a point before this decision needs to be made which will effectively close opportunities available to them.

We value students learning outdoor skills, and about leadership, resilience and environmental interests. New Zealand Fish & Game Council and the Fish & Game Regions employ approximately 80 staff and many of our staff would have been introduced to the outdoors by family, friends and / or school programmes such as Outdoor Education. Our organisation promotes the health and wellbeing benefits of getting in the outdoors. We believe this subject provides good grounding for jobs in tourism, recreation and conservation sectors and therefore would like the status quo to remain.

We have no other points to make regarding the proposed changes to NCEA and we do not wish to speak to this submission.

Attachment 1 – About Fish and Game

About Fish and Game

- 1.1 Fish and Game is the statutory manager for sports fish and game, with functions conveyed under the Conservation Act 1987. The organisation is an affiliation of 12 regional Councils and one national Council. Together, these organisations represent approx. 130,000 anglers and hunters.
- 1.2 The sports fish and game resource managed by Fish and Game are defined and protected under the Conservation Act and the Wildlife Act 1953. The species within include introduced sports fish and a mix of native and introduced waterfowl and upland game¹.
- 1.3 Our vision, purpose and values are illustrated below:

| | | |
|--|--|--|
| OUR VISION Our vision is a New Zealand where freshwater habitats and species flourish, where hunting and fishing traditions thrive and all Kiwis enjoy access to sustainable wild fish and game resources. | OUR PURPOSE Fish & Game New Zealand maintains and enhances sports fish and game birds, and their habitats, ensuring access for current and future generations of New Zealanders. | OUR VALUES TRUST INCLUSION CONNECTION SERVICE |
|--|--|--|

- 1.4 Fish and Game is entirely funded by licence holder fees and private contributions, meaning the delegated function of managing the species for the public good is funded entirely by the users. It is a democratic '*user pays, user say*'s organisation. Using this system, Fish and Game funds public good research to ensure fisheries and game populations are managed sustainably; undertakes compliance with the licencing system; and contributes to public planning processes to ensure that hunters and anglers values are recognised and provided for.
- 1.5 In relation to planning, Fish & Game have the statutory function to advocate for hunters and anglers values and ensure that the habitats of gamebirds and sports fish are provided for. At any one time we may have around 150,000 licence holders, and a larger number (approximately 300,000) that are transient licence holders. The habitat we specifically advocate for includes lakes and rivers that contain trout and salmon (and other sports fish) and wetlands where game bird hunting occurs.

¹ Most New Zealanders refer to these species as 'game birds', distinguishing them from other types of large game, such as deer or pigs. The Wildlife Act 1953 defines these birds simply as 'game' and this phrase is used in the context of this submission.

Fish and Game in Resource Management

- 2.1 Fish and Game works to provide for the ongoing enjoyment of hunting and freshwater fishing assets, the maintenance (or enhancement) of public access to rivers, lakes, and wetlands for hunting and fishing, and the protection of the habitat of trout and salmon.
- 2.2 Hunting and angling require legal and physical access both to habitats and the resource itself. Maintenance and enhancement of access is critically important to the pursuits of our licence holders. The maintenance and enhancement of public access to and along lakes and rivers is listed in the RMA 1991 as a matter of national importance.
- 2.3 We see the opportunity for proposals to be required to provide improved access both to their sites and other nearby areas that involve hunting or fishing values as a form of mitigation for any loss of values on site. We seek that Fish and Game are consulted as an expert advisor where gamebird and or sports fishery values could be impacted. We can work with government officials to ensure outcomes that achieve both economic imperatives, along with recognising and providing for hunting and fishing values.
- 2.4 We specifically seek the protection of:
 - i. habitat of trout and salmon.
 - ii. maintenance and enhancement of public access to and along the coastal marine area, lakes, and rivers where sports fishing and game bird values exist.
 - iii. preservation of the natural character of the coastal environment (including the coastal marine area), wetlands, lakes and rivers and their margins where sports fishing and game bird values exist.
 - iv. Recognition and provision for freshwater angling/game bird hunting and amenity values.

What does Fish & Game do?

Who are we? Fish & Game New Zealand manages, maintains and enhances sports fish and game birds and their freshwater habitats in the best long-term interests of anglers, hunters and all New Zealanders.

Our vision

A New Zealand where freshwater habitats and species flourish, where game bird hunting and fishing traditions thrive and all New Zealanders enjoy access to sustainable wild fish and game resources.

What we do

- Manage fishing and hunting regulations
- Conduct research to monitor fish and game bird populations
- Collaborate with communities to protect natural habitats
- Provide educational programmes and resources
- Advocate for valued habitats and species
- Negotiate and maintain access for anglers, hunters and all New Zealanders

Together, let's ensure a thriving future for fishing and game bird hunting!

What does Fish & Game do?

Species management: We monitor and survey species populations; set season regulations; and sustainably manage pressure on the resource.

Habitat protection: Advocate and take action to protect and enhance lakes, rivers, streams and wetlands; and secure 'national park' status to important rivers through Water Conservation Orders.

Access and participation: Negotiate and advocate so all New Zealanders can access our natural places; maintain access signage, information and brochures; organise fishing and hunting events and classes.

Public awareness: Maintain public advocacy; schools programmes; website and newsletters; community liaison; promote the right of licensed anglers and game bird hunters to pursue their chosen pastime.

Compliance: Recruit, train, equip and coordinate warranted rangers, to educate and enforce regulations to ensure the fish and game resource is sustained.

Licensing: Provide a nationwide licensing system with a range of licence categories and sales channels that makes it easy to buy a licence. We are solely funded by licence holders.

Council: Hold public meetings of elected licence holders to approve regulations and budgets, set policies and provide governance for the Fish & Game system.

Coordination and planning: Provide research, planning and reporting; financial management and general coordination across Fish & Game New Zealand.
