INTRODUCTION

1.1 Preamble

Fish and Game Councils are required to annually prepare an Operational Work Plan (OWP). This operational work programme covers the period 1 September 2020 to 31 August 2021 and is prepared in accordance with the requirements of the *Conservation Act 1987*.

1.2 Purpose of the Operational Work Plan

Apart from the statutory requirement outlined above, the primary purpose of the OWP is to ensure the effective utilisation of Fish and Game New Zealand resources in achieving the priorities of the region. Specifically, the OWP:

- establishes management goals and priorities;
- provides direction to council and staff;
- establishes a basis with which to measure the performance of management and council.

1.3 Mission Statement

To manage, maintain and enhance the sports fish and game resource in the interest of anglers and hunters.

The functions of Fish and Game New Zealand, as described by the *Conservation Act* 1987, include:

- monitoring sports fish and game bird populations;
- monitoring the success and satisfaction of users;
- monitoring the condition and trend of ecosystems as habitats for sports fish and game;
- · maintaining and improving access;
- maintaining and enhancing the habitat of sports fish and game;
- formulating and establishing regulations and policies which ensure the maintenance of sports fish and game populations and the recreational experience;
- securing compliance with sports fish and game regulations;
- promoting recreational angling and game bird hunting;
- representing the interests of anglers and hunters in the statutory planning process;
- keeping anglers and hunters informed.

Whilst being mindful of these functions, the emphasis of the OWP in any one year must reflect the current requirements or priorities of Council. Council does not have the capacity to spread resources equally across each function or output category. The OWP takes into consideration the current operational state of the Hawkes Bay Region.

In recent years Fish and Game New Zealand has identified organisational priorities and the intention has been that these priorities would make up a significant component of each region's work plan. The Hawkes Bay Council has supported this initiative with recent work plans focusing on the implementation of projects relating to habitat, public awareness and water quality and quantity issues. These priorities continue to form the basis of the work plan for the 2020-2021 year.

1.4 Determining Priorities for the 2020-21 Year

Council held a meeting on 4 February 2020 to formulate further detail on the priorities.

Council considered the following as priorities for the 2019-2020 year and considered them still priorities for the 2020-2021 year.

- Advocacy building NZFG organisation positively & working alongside NZ Council to achieve advocacy goals.
- Education & Training programmes.
- Development of a wetland educational facility at the Game Farm
- Improving & building better relationships with rural New Zealand.
- Opportunity access to the resource & maintenance of existing F&G infrastructure.
- Promotion of sports fishing and gamebird hunting to new licence holders
- Predator Free NZ Link with other organisations & provide advice & assistance.
- Public relations improve communications with our licence holders & licence agents.
- R3 programme recruit, retain & reactivate
- Right to fish/hunt. The retention of social licence and approval of the general public.
- River Fisheries inventory, water quality & quantity & access points.
- Wetland Advice create how to "one stop shop" for those interested in building or enhancing wetlands on their own private land.

1.5 Relationship between Priorities and Projects

To assist the development of project areas the following summary has been prepared. It documents the key projects currently being completed as well as the developing issues that relate to each of the priority areas. A number of project areas are listed as a consequence of this information.

1. WETLAND HABITAT

Key Projects 2020-21

- Continue to promote habitat development on private land. Look for more engagement with landowners to see the uptake of services. Continue to work with Hawkes Bay Regional Council (HBRC) with their wetland projects in the Tukituki Catchment.
- Increase involvement with landowners and assist them with grant applications to the Game Bird Habitat Trust.
- Seek external funding for significant wetland programmes.
- Participate in National and Inter Regional Mallard Research Programmes.
- Become involved in the Predator Free NZ movement and provide practical predator control advice and assistance to landowners.

Developing Issues

• Competition for funding among projects

Proposed Project Areas

- Actively promote habitat development on private land.
- Continued involvement in HBRC and Fonterra funded Tukipo Catchment wetland developments.
- Seek additional funding for habitat enhancement for significant wetland areas.
- Seek involvement and collaboration with predator free organisations in Hawkes Bay and upskill field officers to be able to provide practical assistance to landowners using poisons.

2. RIVERINE HABITAT

Key Projects 2020-21

- Maintain regional Didymo advocacy programme.
- Submit to consent processes of significance to the region's river fisheries
- Continued participation in the Tukituki Taskforce.

Developing Issues

- RMA reforms could have detrimental effects on water quality and biodiversity.
- Didymo remains out of the North Island. The longer it remains out of the North Island the more difficult it is to maintain the motivation of freshwater users to be vigilant. The national programme has now been extended to include other aquatic pests.
- The general continued decline in water quality of Hawkes Bay catchments and further demand by irrigators for more extraction.
- Regional Policy Statement and plan changes.

Proposed Project Areas

- Input to the Tukituki Catchment taskforce.
- Preparation of consent submissions.
- Ongoing commitment to Didymo advocacy.

3. GAME FARM

Key Projects 2020-21

Development of the proposed adjacent wetland site for use as an educational facility. Use
this facility as part of a 'One stop shop' for wetland creation and enhancement for
landowners.

Developing Issues

• Funding may limit options.

Proposed Project Areas

- Apply for funding for the development from external sources for the development of a Game Farm wetland educational site.
- Encourage involvement from local schools, anglers clubs, Forest and Bird, DOC and HBRC.
- Review further options for the development of the site in a phased approach.

4. ACCESS/CLIENT SERVICING

Kev Projects 2020-21

- Maintain the current level of access and signage across the region.
- Engage with the Walking Access Commission to improve access where possible.
- Improve and/or clarify access to public areas for game bird hunting.
- Increasing junior/novice and female participation in both fishing and game bird hunting.

Developing Issues

- Promotion of and clarification of access to fishing and hunting opportunities as they
 arise.
- Competing leisure activities and financial constraints changing people's spending priorities and the way they spend their time.

Proposed Project Areas

- Continue erecting new and replacement signage.
- Support NZ Council development of an access app by providing all Hawkes Bay access info. Keep website updated and use other media for more effective distribution of access information.
- Continue to run junior/novice fly fishing courses with local anglers clubs using the Game Farm facilities.
- Contribute to Fish and Game access app development at a national level.
- Engage with HBRC land management staff to ensure future access for hunters to the region's river margins.
- Engage with landowners, forestry managers and HBRC staff to create future balloted waterfowl and upland game hunting sites for junior/novice hunters.

5. COMPLIANCE

Key Projects 2020-2021

- Improve the level of compliance activity throughout the region particularly at key times.
- Develop a strategy to check a minimum of 10% of licence holders per season.

Developing Issues

• Recession placing pressure on people's discretionary spending. Temptation to continue fishing/hunting without purchasing a licence. Hawkes Bay is a large area and anglers tend to be well spread throughout. Obtaining a large number of contacts requires a considerable amount of effort. Backcountry areas need to be targeted for enforcement.

Proposed Project Areas

• Improve the delivery and efficiency of field operations via the use and co-ordination of honorary rangers which will include additional recruitment and training. Focus on upskilling a new team of active honorary rangers.

6. COUNCIL

Key Projects 2020-21

• Improve capacity for Council to engage with Governors from other agencies to influence the thinking and decision-making processes.

Developing Issues

- Councils tend to be disenfranchised from the interactions with Governors from other key decision-making agencies.
- Councillors unsure/unable to facilitate meetings.
- Iwi will be key players in future decision-making processes around freshwater.

Proposed Project Areas

• Further develop relationships and engage with local iwi and Hapu groups.

7. LICENSING

Key Projects 2020-21

• Continue to improve point of sale options for clients via Agents online and Public online.

Developing Issues

• Fish & Game clients are seeking innovative and easier ways of accessing licences such as via smart phones. A wider range of licensing options is preferred and is being reviewed nationally.

Proposed Project Areas

 Work with National Office staff and the licence working party to review licence categories and point of sale options and promote increased sales including the development of the Fish and Game mobile app.

8. PLANNING

Key Projects 2020-21

• Sports Fish and Game Bird Management Plan. – Incorporate new plan into future OWPs.

Proposed Project Areas

• Further staff exchanges with other Fish & Game regions.

In addition to these priorities the New Zealand Council had identified two key issues nine years ago and asked that regions consider them in determining their work plans. These priorities remain the key ones today. The main project areas are listed below the two priorities.

Priority One

To seek improved habitat protection performance by those agencies with statutory habitat protection responsibilities, namely Regional Councils and the Department of Conservation.

Project Activity

1. Engage with regional and district councils, and Department of Conservation to seek improved habitat and biodiversity protection leadership by these agencies.

- (i) Make submissions to regional council chairpersons and regional conservators on significant regional matters. Engage in governor-governor meetings where appropriate.
- (ii) Regional Manager to meet with Regional Council and Department of Conservation senior managers on a regular basis and when significant issues are developing.
- 2. Ensure political awareness and support for improved habitat performance.
 - (i) Regional Manager and staff to visit some electorate MPs during the year.
- 3. Ensure public are aware of the habitat issue and need for leadership by key agencies.

(i) Regional media programme as per project 1421.

Priority Two

To gain greater understanding and operational commitment to the "champions strategy" in order to enhance Fish & Game New Zealand's reputation with the wider public and effectiveness as the protector of the public interest in clean water, public access, wetlands and the hunting and fishing heritage,

- 1. Fish & Game's public awareness programme is coordinated effectively.
 - (i) Contribute to national public awareness network.

 Review and implement marketing and public awareness programmes in conjunction with national public awareness network.
 - (ii) Support national public awareness events.
 - (iii) Review website content and manage to increase effectiveness as a tool for public awareness and communicating with licence holders.
 - (iv) Extend media programme to rural sectors.

1.6 Structure of the Operational Work Plan

This plan is based on the eight outputs and one input which have been adopted nationally as the basis for development of Operational Work Programmes. Within each output category individual projects are grouped together within project clusters or groupings including similar activities.

Reporting

Completion dates for projects and associated reporting dates are noted for each project where possible. It is difficult to provide specific measurable targets for some of the general internal tasks that are required to keep the organisation operating smoothly. In these cases, the project descriptions do not include specific targets or completion dates. Unless stated otherwise, project reports are made to the Regional Manager. A summary of these reports is presented to the Hawkes Bay Fish and Game Council at the completion of the year and forms the basis of the annual Performance Report.

Direct Costs

Direct costs in terms of staff time and money are indicated for each project cluster. This allows direct and operational costs to be identified when assessing work priorities, particularly if it becomes necessary to adjust the plan during the year due to unforeseen circumstances.

Resourcing the Work Plan

The Bulk fund operational Budget for the 2018-2019 year is \$383,408. Plus \$4,094 CF bid – if approved would take the Budget for 2019/20 to \$387,502

SPECIES MANAGEMENT

Goal

To manage sustainable populations of sports fish and game bird species to provide for recreational harvest.

This output focuses on the sustainable management of sports fish and game bird species. This includes waterfowl population monitoring, sports fish and game bird population management, establishing regulations to ensure user harvest occurs on a sustainable basis and mitigating significant game bird damage to private property.

An investment in time and money over the past decade has seen significant gains in our knowledge of the region's dabbling duck resource. Further mallard population research and monitoring is being undertaken at both national and regional levels. Monitoring fisheries can be expensive and time consuming; significant resource is being used on these processes.

Didymo remains out of the North Island. This will in part be a result of extensive advocacy programmes over the past nine summers. The input to these programmes will be maintained as will the region's contribution to regular (four times a year) monitoring of the key river fisheries to ensure that detection of any incursion occurs early.

Angler concerns regarding the decline in water quality across the region particularly the Mohaka and Tukituki catchment have been confirmed by water quality monitoring carried out by the HBRC. The decline in water quality results from non-point source pollution, i.e. farm runoff.

The Tukituki catchment will continue to require significant focus. There are still issues to be resolved but Hawkes Bay Fish and Game will continue to be involved in projects with HBRC/HBRIC and work through these issues.

There has been a lack of fishery monitoring occurring over recent years and there is a need to rekindle old monitoring programmes and surveys as well as design new ones to better understand what is happening across the Hawkes Bay rivers and small lakes and to help future proof these fisheries against new development proposals and future environmental issues.

Lake Tutira and Waikopiro continue to experience very high surface temperatures, low dissolved oxygen readings and subsequent algal blooms over the summer months which all

take their toll on this unique lake fishery. An experiment using an 'Air curtain' is currently underway in Waikopiro which is showing limited success. If this is deemed a viable part of the solution, a larger air curtain could be put in to Tutira. Working with the local Iwi and other key stakeholders such as DOC and HBRC is necessary to come up with long term solutions to protect this fishery.

A national Mallard Research project is continuing to operate, and we contribute to the project in conjunction with adjoining regions through the monitoring of mallard populations within the Hawkes Bay Region including the banding programme and aerial transects.

Species Management Project Clusters

PC111	0: Species Monitoring: To Assess and Monitor Fish and Game I	Bird Populations within the		
Hawke's Bay Region.				
Project	and Objective	Performance measure		
1111	 River fisheries investigations (i) Contribute to the continuation of the regional Didymo surveillance programme. Instigate monitoring programmes for sports fish populations in the region's key river fisheries and where possible work with other agencies to collect fishery data. 	Report river fishery investigation results to Council by 31 July 2020.		
1112	Data watch To monitor the Lake Tutira fishery using the "data watch" programme. Include evaluation of reporting rates.	Report on tag returns to each meeting of the Council.		
1114	Lake Tutira To monitor the Lake Tutira trout fishery.	Report activities to the following meeting of Council.		
1115	Upland / Headwater Fisheries To monitor headwater fisheries using drift dives and other monitoring techniques.	Report activities to the following meeting of Council.		
1116	Game bird trend counts i)To monitor black swan and paradise shelduck populations within the Hawkes Bay Region using aerial trend counts. ii) Trial the use of drones for this project during the 2020/21 year and compare data quality with 'normal' counts.	Presentation to Council of a report by 30 October 2021.		
1117	Game Bird Research (i) Contribute to national research programmes on mallards. (ii) Implement the five-year strategic research and management work plan for game birds.	Promote predator control on existing and future habitat. Provide Council with regular updates on the Mallard Research Program and the five-year strategic research and management work plan. Provide Council with a report on the predator control project by 31 August 2021.		

1118	Waterfowl monitoring programme (i) Collaboratively monitor waterfowl populations within proposed Duck Management Units with adjoining Fish & Game regions via a combination of trapping/banding and aerial surveys. Investigate the partial or full replacement of our waterfowl banding programme with aerial drone counts.	Report interim results to the February 2020 Council meeting and provide a full report detailing the status of these populations by 31 August 2021.
1119	Predator Control (i)Develop working relationships with Predator Free organisations within Hawkes Bay. (ii)Provide advice and assistance to landowners on trapping and poisoning methods including follow-up site visits to Gamebird Habitat Trust grant recipients (iii)Investigate option of partnering with a local manufacturing firm to provide more cost-effective trap options for landowners.	Provide Council with an update by 31 August 2021
Direct	Costs: \$7800 Hours: 1120 Internal Costs: \$65,232	Total Costs: \$ 73,032

1121 River fisheries creel surveys Utilise and review the online angling diary programme to assess angler catch, harvest and satisfaction from rivers and streams in the Hawkes Bay region. 1122 Game Bird Hunter Survey Assess the harvest of game birds by hunters and hunter effort	Report on the 2020 winter creel survey by 28 February 2021 and the 2020-2021 summer creel survey by 31 August 2021.
Assess the harvest of game birds by hunters and hunter effort	
during the 2020 season.	Present the results of the 2021 game season hunter surveys to Council by 30 November 2021. Complete the 2021 game bird hunter surveys by 31 August 2021

-	ate fish population	n (
Project	and Objective	Performance measure		
1161	regard to the rele Tangitu and othe (ii) Liberate & ta	iscuss and work toward case of trout into Tutira or interested parties. The second of the second of the second of the second of trous and second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the seco	with Maungaharuru	Complete liberations by 31 August 2021 and report liberations to the following meeting of Council.
Direct	Costs: \$3,319	Hours: 20.00	Internal Costs: \$1,165	Total Costs:\$4,484

Project	and Objective	Performance measure
1171	Sports Fish Regulations To maintain sports fish resources through the development of an annual angler's notice.	Recommend fishing season conditions for the 2020-21 Anglers Notice by 30 June 2021.
1172	Game Bird Regulations To maintain game bird resources through the development of annual game season conditions.	Recommend game season conditions for the 2021 season to the NZ Council by 3 February 2021.

Project	and Objective	Performance measure
1181	Game Bird Control (i) To reduce damage to crops from unwanted aggregations of game birds through assisting landowners and utilising the efforts of game bird hunters wherever practical. (ii) Minimise avian botulism outbreaks through dispersal or collection.	Respond to landowner requests for assistance to disperse game birds by issuing permits to disturb. Report to Council on number of permits issued in the year end Performance report.

SPORTS FISH AND GAME BIRD HABITAT PROTECTION AND MAINTENANCE

Goal

To manage, maintain, and enhance sports fish and game bird habitat to maximise recreational opportunities for anglers and hunters.

Description

The maintenance, enhancement and management of habitat remain the number one national priority for Fish and Game New Zealand and this region. The Hawkes Bay is a highly modified landscape and has a significantly low number of wetland areas compared with many regions, only 3% of Hawkes Bay original wetland area remains. In order to protect what remains and enhance what is possible the following tools are considered:

- Protection of habitat values through statutory processes
- Creation or enhancement of habitat on private land
- Increasing capacity in the region to respond to requests for assistance in freshwater habitat projects

The Council's main habitat priorities have been for some years and remain:

- Increasing waterfowl numbers through activities that enhance wetland habitats
- Protecting free flowing water resources from inappropriate resource consent proposals
- Encourage enhancement of water quality and reduction in water abstraction

The Hawkes Bay region continues to create enhance and restore habitat. The programme is in conjunction with Game Bird Habitat Trust Board and HBRC to encourage the enhancement of wetlands on private land. Fish and Game New Zealand has staff with key technical knowledge and expertise in wetland construction in New Zealand. This knowledge is provided to HBRC staff and neighbouring F&G regions at no cost to assist with their on-farm projects.

In conjunction with the on-farm programme, Fish & Game also seeks funding for large wetland projects directly managing the restoration of a number of regionally significant wetlands itself. Previous restoration projects carried out on Lake Runanga and Pirimu Lake will require some ongoing maintenance. These projects were carried out with funding obtained from the HBRC on-farm subsidy, New Zealand Game Bird Habitat Trust Board and the DOC Community Fund. The current direction will be to continue to build on this programme by allowing maturing projects to drop off and new projects to come on stream through funding applications.

Community expectations for water quality have changed significantly over the past decade. Public perception of water quality affected by primary production has changed. Management of farm effluent and runoff continues to be perceived as the least well managed of the environmental problems investigated. The region will continue to monitor the effects of land use change on rivers within the region and take action where appropriate.

Resource Management Act

The Resource Management Act was enacted in 1991 to enable the sustainable management of New Zealand's land, air, and water resources. While Regional and District councils are responsible for resource management, it is important that Fish and Game New Zealand has an input to planning decisions. The success of sports fish and game bird populations is dependent on the quantity and quality of habitat available. One of the functions of Fish and Game Councils is to represent the interests and aspirations of anglers and hunters in the statutory planning process. With ongoing involvement in the Tukituki catchment, the WCO proceeding for the Ngaruroro and the TANK process, significant time will need to be allocated to RMA issues and the consent procedures.

Sports Fish and Game Bird Habitat Project Clusters

PC1210: Resource Management Act: To effectively represent Fish & Game interests and the aspirations of anglers and hunters in resource management processes and strategies by advocating for sports fish and game bird habitat values, angling, and hunting values in statutory and non-statutory planning processes.

Project	t and Objective	Performance measure
1211	RMA Planning (i) Review plans, strategies and consents and advocate for decisions and conditions that promote sports fish and game bird interests and the interests of anglers and hunters. (ii) Contribute to the improvement of water quality in the Hawkes Bay rivers and Lake Tutira via collaborative processes, research, and fishery and angler monitoring. (iii) Minimise effect to fisheries from impacts that may arise from activities intending to improve water quality in the Hawkes Bay region. (iv) Utilise river investigation projects to advocate for improved water quality. (v) Make submissions on regional and district council planning documents to promote rules that facilitate game bird habitat enhancement. (vi) Contribute to the HBRC programmes in the Mohaka, TANK and Tukituki catchments. (vii) Work with HBRC to monitor the effects of river management techniques on trout fisheries.	Participation in collaborative processes; develop relationships and meet with interested and affected parties including iwi regularly and/or as required; provide staff support and assistance to Maungaharuru Tangitu Trust initiatives at Tutiras appropriate. Report activities to each meeting of Council as appropriate.
1212	Consent Applications Review and respond to consent applications and advocate for decisions and conditions that provide for sports fish and game bird interests and the interests of anglers and hunters.	Report activities to each meeting of Council as appropriate.
213	RMA Conservation Order Support the Water Conservation order for the Ngaruroro and Clive rivers.	Report activities to each meeting of Council as appropriate.

Dunings	20: Works and Management: Wildlife Management and Other Vand Objective	
		Performance measure
1221	Reserves Management – Lake Pirimu, Railroad Wetland and HBRC Reserves (i) Manage water levels and habitat in wildlife management reserves, advocate and maintain optimum conditions for waterfowl. (ii) Work with Regional Council to obtain leases on Council	Report activities to each meeting of Council as appropriate.
Direct	Reserves. Costs: \$1500 Hours: 27.00 Internal Costs: \$1,	573 Total Costs: \$ \$3,073

Project	and Objective	Performance measure
1231	Maintain and Enhance Game Bird Habitat Develop positive working relationships with landowners and other parties with an interest or involvement in rural land management including local and regional authorities, DOC, Federated Farmers, and Dairy NZ. (i) Provide advice to enable and encourage hunters/landowners to	Respond to all landowners' requests for advice and contribute to the development and/or enhancement of habitat that enhances waterfowl productivity. Report activities to the following
	develop quality, productive wetland habitat. (ii) Advocate for better drain management and work collaboratively with agencies such as Hawkes Bay Regional Councils, Federated Farmers and Beef & Lamb to enhance habitat in drainage canals. (iii) Investigate methods to enhance drainage ditches for	meeting of Council. (i) Make one application for external funding for an enhancement project.
	waterfowl habitat and collaborate with HBRC staff to monitor results. (iv) Investigate management options to enhance stock ponds and implement enhancement projects. (v) Investigate opportunities to enhance game bird habitat (i.e. riparian plantings, planting erosive hillsides). (vi) Make at least one external funding application for wetland habitat development.	(ii) Report activities to the following meeting of Council. (iii) Identify farm ponds for enhancement and develop management plans for ponds.
	 (vii) Use media (press releases, articles, and video) to encourage the creation and enhancement of wetland habitats. (viii) Continue developing the native plant nursery at the Game Farm and investigate opportunities to work with other interested groups. 	(iv) Shade house operational and producing plants for future habita projects.
		Report activities to the following meeting of Council.
1232	Riparian Habitat	
1233	Enhance game bird riparian habitat. Land Owner Consultation	Report activities to the following meeting of Council.
	Meet with landowners to discuss the development and enhancement of wetlands in the Hawkes Bay region.	Report activities to the following meeting of Council.
1234	Implement 5-Year Habitat Plan Implement the approved 5-year habitat plan.	Report activities to the following
1235	Lake Tutira Habitat Work with Iwi and other agencies to improve habitat and water quality around the margins of Lake Tutira.	meeting of Council.

ANGLER AND HUNTER PARTICIPATION AND SERVICES

Goal

To encourage angler and hunter participation while maintaining the quality of the recreational experience.

Description

The region has an extensive signage programme, great access to the key fisheries and a comprehensive angler and hunter information package. This programme is successful and is well utilised by clients. The region's updated website and Facebook page are increasingly becoming a key point of contact for anglers and hunters.

The national licence working party is continuing to consider new licence categories some of which were rolled out during the 2015-16 season. This region will support and encourage these reviews. Agents Online and Public Online are receiving increased usage year upon year.

Access to public areas within the region is important as most hunting opportunities exist within land that is administered publicly by either regional or district councils or the Department of Conservation.

The Walking Access Commission (WAC) is confronting access issues throughout the country. Hawkes Bay Fish & Game has good relationships with WAC staff and will collaborate with the WAC to resolve access issues within the region as they arise.

"R3" or Recruitment, Retention and Reactivation, is a relatively new concept that has been created to help address the issue of declining participation and subsequently declining licence sales worldwide. This concept focuses on identifying new methods of getting potential anglers and hunters (recruit), ensuring that current anglers and hunters continue to fish and hunt each year (retain) and identifying those who haven't hunted or fished for a while and bringing them back into the sport (reactivate).

New participants from various demographics need to be provided with various learning opportunities to enable them to progress from being an interested observer through to an active participant. There needs to be an array of experiences and contacts made over time so that participants can become mentored into fishing and hunting. Hawkes Bay Fish and Game needs

to help build a pathway to create lifelong participation and help the next generation complete that journey.

Hawkes Bay Fish and Game also needs to work with other stakeholders to offer the participants different levels of engagement along the recruitment pathway. Expertise and resources can be shared with other fishing and hunting clubs and licence agents to help connect potential participants to a variety of opportunities and move them through the necessary stages needed to become lifelong participants. Recruitment and retention are long term processes and although single events or activities don't always lead to recruitment, they can be a spark that ignites a lifelong passion in hunting and or fishing.

Encouraging young and novice anglers and hunters is an area that the Council should focus on. This should also involve educating families where possible, so that they can collectively learn and coach each other while undertaking these activities as a family. Partnering with local anglers to provide courses using the Game Farm facilities continues to be a good way of providing opportunities for youth/novice anglers and develop a relationship with local clubs.

A relatively low number of females currently fish or hunt. Females are a large and influential market and in today's busy world often influence how family leisure and recreational tim is spent. Fishing and hunting activities provide both physical and mental health rewards by being outdoors but also social benefits of being together socially as a family. If it were possible to overcome the low participation of women, Fish and Game councils would have access to a far larger target audience.

The region has a successful junior hunter programme on upland game properties with special conditions. Other opportunities are being investigated to get more junior and novice hunters involved. Fish and Game also operate a successful Kid's fishing day to introduce young children into fly fishing. An opportunity exists for the region's angling clubs to also host additional events at the game farm site and encourage younger members into their clubs and into the sport of fly fishing especially those juniors aged between 12 and 17 years of age.

Communication

All whole season licence holders will receive at least two publications during the 2019-20 year. The *Fish and Game New Zealand* publication will continue to be published as part of the Fish and Game New Zealand magazine plus a pre-season fishing and game season local newsletter. In addition, communication with clubs and licence holders is facilitated through a six-weekly electronic newsletter Reel Life and/or Both Barrels, attendance at club meetings and the Fish and Game New Zealand internet site. The region's web pages and the Facebook page have become an important medium for contacting licence holders. They have the advantage of low cost and ease of maintaining up-to-date information and will continue to be expanded to add

new content and innovative media for encouraging participation and involvement in the Council's key output areas.

The Game Farm pond allows the Council opportunities to have wider and direct contact with the public through children's fishing days. This option presents an opportunity for the Council to have a greater profile in the Hawkes Bay community and to contact young people and their families and encourage them into fishing, so they can collectively learn and coach each other while undertaking the activity as a family.

A licence holder satisfaction survey for Hawkes Bay anglers and hunters is required as a starting point to better understanding what our licence holders want. Fishing and hunting licence sales are generally declining over time and Fish and Game needs to better understand why they are declining before they can attempt to address the issues. Understanding more what licence holders want could help us improve licence sales, satisfaction and participation in the future.

Angler and Hunter Participation Project Clusters

	ces of the Hawkes Bay Region and Objective	Performance measure
1311	Maintain & Enhance Access Physical and legal access to angling and hunting opportunities. (i) Investigate new angling and hunting access opportunities in the Hawkes Bay region. (ii) Maintain signs and enhance access through signage at key fishing and hunting access points. Maintain signage inventory databases. (iii) Continue to maintain a good working relationship with the Walking Access Commission. (iv) Evaluate the opportunities to improve general hunter access to public hunting areas where access is under the control of groups outside Fish & Game. (v) Allocate and manage balloted hunting stands and forestry blocks. Develop relationships with forestry managers. (vi) Develop and maintain physical access to the region's rivers and Lake Tutira fisheries. The latter will involve the development and maintenance of a closer working relationship with iwi.	(i) Maintain access tracks to significant, publicly accessible tracks within the Hawkes Bay region. (ii) Investigate any new access opportunities. (iii) Allocate balloted hunting stands. (iv) Make submissions to WAC and Treaty settlements where appropriate. (v) Report activities to the following meeting of Council.
1312	Signage Maintain signs and enhance access through signage at key fishing and hunting access points. Maintain signage inventory databases.	(i) Maintain signage database. (ii) Report activities to the following meeting of Council.
1313	Hunter Ballots Allocate and manage balloted hunting stands and forestry blocks if available.	Allocate balloted hunting stands.

PC1320: <u>Licence Holder Satisfaction Survey</u> : To undertake a licence holder satisfaction survey to better understand what our licence holders want.					
Project and Objective		Performance measure Create and circulate survey and collate survey results. Analyse survey results and report to Council.			
Create and cunderstand	Satisfaction Survey Create and circulate a satisfaction survey to all licence holders to understand what licence holders want and help increase future licence sales.				
Direct Costs: \$0	Hours: 30.00	Internal Costs: \$1,747	Total Costs: \$1,747		

PC1330: Newsletter, Licence holder communications: To effectively inform anglers and hunters of matters relating to Fish & Game and opportunities for increased participation

PUBLIC INTERFACE

Goal

To maximise public awareness of the values associated with the sports fish and game bird resource, and support for the management role of Fish and Game New Zealand.

Description

Public awareness is an increasingly significant component of Fish & Game activities. How effectively we work with other agencies and how well we communicate our messages to both our clients and the general public has ramifications for the future viability and acceptance of our sports. In addition, providing Fish & Game focused educational experiences for children is important if the acceptance of sports fishing and game bird hunting is to be maintained and the awareness of environmental issues increased. The Game Farm has significant potential to contribute to Fish & Game related education and awareness programmes.

The New Zealand Council have retained the two key priorities for the 2019-20 year with the expectation that, where possible, they will be applied consistently across all regions. These priorities continue to seek better performance from agencies that have key environmental responsibilities such as regional and district councils and the Department of Conservation. This region has now established strong and direct relationships with key agencies that influence areas of significance to sports fish and game bird populations. Staff and Council will continue to develop these relationships.

The area that remains to be strengthened in the region is with iwi. It is evident that iwi will have a significant say in the future management of the region's freshwater resources. It is important that this region seeks to engage with iwi in a more direct manner to gain appreciation of each other's views and values. This will be facilitated through greater direct contact from working alongside each other on specific issues e.g. Tukituki catchment issues and Tutira habitat improvement.

The region is developing stronger media relationships within Hawkes Bay. This has shown benefits in improved contact and input to media articles of relevance to Fish & Game. The media programme will be continually developed, and regular material provided to media outlets for publication, both radio and print.

The region's web pages are an important tool for providing public awareness information. This region has been proactive in doing so and will continue to develop the region's pages to enhance this function along with its growing Facebook page.

The Game Farm offers a significant opportunity to enhance the public awareness of Fish & Game. The Game Farm site has an important story to tell with many visitors not fully aware of the site's full history. An example wetland in the neighbouring paddock will help showcase what Fish & Game does and this will become a valuable teaching resource on our doorstep for children and landowners alike. As the site is developed and improved and facilities added, the Council will be able to capitalise on the profile the site has and the options it presents through partnership school programmes, wetland planting, design and pest control workshops and children's fishing programmes.

The recent activities in the region around water have shown the benefit accrued from a positive relationship with the media. The media can be a powerful mechanism to convey messages, if managed carefully. The flow of information to the media of a routine or normal basis for us has shown benefit with stories run on Fish & Game's work programmes. Relationships with the media will continue to allow the useful flow of information back to our clients and the wider community.

Public Interface Project Clusters

Project	and Objective	Performance measure
1411	Statutory Liaison and Political awareness (i) Maintain a structured liaison and advocacy programme with key agencies and individuals. (ii) Engage with Regional Councils and the Department of Conservation to seek improved biodiversity and habitat protection leadership by these agencies in the Hawkes Bay region. (iii) Engage with iwi groups and tribal authorities as required. (iv) Ensure political awareness of Fish & Game activities and support for improved habitat performance.	(i) Regional Manager to meet with Regional Councils SMT and DOC directors on a regular basis. Staff to attend Conservation Board meetings at least annually. (ii) Make submissions to Regional Council and the Department of Conservation on significant regional matters. Engage in governor-governor meetings where appropriate. (iii) Regional Manager and staff to visit some electorate MPs during the year. Report activities to following meetings of Council.

Project	and Objectives	Performance measure	
1421	Public Communications (i) To advocate the interests of anglers and hunters through maintaining effective communication with non-statutory groups or individuals such as farmers, iwi and the general public via public awareness events. (ii) Implement regional public awareness programme and identify and progress marketing opportunities. (iii) Maintain a strong presence in general public media. (iv) Engage and communicate with rural community and land owners. Develop relationships with groups including Federated Farmers, Fonterra and Dairy NZ. (v) Engage with iwi and initiate formal relationships with key iwi groups across the region and participate in Treaty Settlement processes that affect anglers and hunters.	(i) Contribute to national public awareness network. (ii) Support public awareness events. (iii) Review website content and manage to increase effectiveness as a tool for public awareness and communicating with licence holders. (iv) Extend media programme to include items of general interest. (v) Submit on Treaty Settlements affecting angler/ hunter access and develop relationships with key iwi groups. (vi) Prepare and distribute media press releases including rural media. Report to Council as appropriate.

Ongoing grounds maintenance and improvements. Report to Council as appropriate.
Report activities to the following meeting of Council.
Report to Council as appropriate.

COMPLIANCE

Goal

To protect the sports fish and game bird resource and its user management through enforcement and education of legislative requirements.

Description

The maintenance of an effective compliance programme is a vital part of Fish and Game management. Compliance activities have three objectives, they provide satisfaction for licence holders that others utilizing the resources are paying the same as they are, they ensure that regulations intended to protect resource sustainability are complied with, and they also provide a deterrent to protect our income base.

The nationally agreed compliance target level is 95%. In addition, to be effective, Fish & Game New Zealand management activities rely on compliance with fish or game regulations. The Council is intending to continue with strategic and structured approaches to law enforcement work to maximise contacts and the subsequent deterrent effect. This work will also incorporate a component of field education to take advantage of contacts with clients and provide information and advice to improve their hunting or fishing success.

Law enforcement is labour intensive and a significant regional coverage by staff is often not possible. Honorary rangers have the potential to make a substantial contribution to compliance, though consideration will need to be given as to how this might work in the context of recent changes to Health and Safety legislation.

Efforts to increase compliance include proactive ranging strategies, including staff and honorary ranger capability enhancement, and co-operation with other agencies.

The overall compliance strategy will continue to see staff provide the majority of the field contacts in line with other activities or programmes that entail a component of field work.

Compliance Project Clusters

Project and Objective Performance measure		
1511	Ranging (i) Maintain a high level of participant contact through enforcement and monitor compliance with licensing and season conditions. (ii) Check fisheries throughout the season including effort in remote areas. (iii) Check game bird hunters throughout the season.	Organise ranging activity to achieve 300 angler and hunter contacts. Aim for 95% compliance with legal requirements and season regulations from anglers and hunters contacted. Provide report to each meeting of Council.

	resourced personnel

LICENCING

Goal

To optimise the sale of angling and hunting licences as valued products.

Description

Fish and game management is funded almost solely by revenue derived from the sale of fishing and hunting licences. In previous years the management of licence sales has occurred internally with each region providing these services. These requirements have now been contracted to an external service provider. Regional requirements are to manage regional licence sales information, coordinate any marketing/sales efforts and provide client service information to licence agents.

The national licence working party is tasked with reviewing licence sales channels and options along with licence categories. This work is a priority area of Council and will be supported where possible through input to the licence working party outcomes.

Licensing Project Clusters

PC161	0: Licensing: Maintain and monitor a readily available and ef	ficient licensing system	
Project	and Objective	Performance measure	
1611	Licence Production and Distribution To issue fishing and hunting licences and the appropriate regulations in a timely manner and market new fishing licence categories to existing and potential licence holders.	To have available fish licences and regulation guides for the 2020-2021 season by 1 September 2020. To have available game licences and regulation guides for the 2021 season by 31 March 2021.	
1612	Analysis of Licence Information Evaluate licence sales information during the year and identify targeted marketing opportunities.	Provide detailed reports of licence sales performance to each meeting of Council.	
1613	National Licence Management To support the operation of the national licence management provider.	Report activities to the following meeting of Council.	
1614	Increase Licence Sales Actively promote Fish and Game licences to the public and contribute to the national sales targets.	Report activities to the following meeting of Council.

1621	Licence Agen Communicate training as requ	and work with licence age		Complete at least three visits to al significant licence resellers by 31 August 2021.	
Direct	Costs: \$500	Hours: 120.00	Internal Costs: \$6,9	89 Total Costs: \$7,489	

COUNCILS

Goals

To provide for the democratic governance of the fish and game system by fish and game licence holders.

Description

A council elected by licence holders for a three-year term manages the fish and game resource on a regional basis. Fish and Game Councils are required to meet at least six times a year to consider issues affecting sports fish, game birds and approve an Operational Work Plan and budget which establishes staff activities and priorities for the coming year.

This output involves the servicing of Council, including preparation of agenda, meeting reports and minutes.

PLANNING AND REPORTING

Goal

To meet Fish & Game's statutory reporting requirements.

Description

Fish and Game Councils have certain statutory planning requirements that they must meet. These include:

- The preparation of a Sports Fish and Game Management Plan;
- An Annual Operational Work Programme;
- Statement of Service Performance;
- Annual Performance Report and Statements of Account.

The Sports Fish and Game Management Plan for Hawkes Bay Fish & Game operates under, covers the ten-year period from 2018 to 2028 and assists in the development of Operational Work Plans.

Increasing the effectiveness of inter-regional co-operation has previously been identified as a national priority. The Hawkes Bay Council is committed to improving the efficiency of the organisation.

Planning and Reporting Project Clusters

INPUTS

ADMINISTRATION

Goal

To manage the business of the Hawke's Bay Region of Fish and Game New Zealand in an effective and cost-efficient manner.

Description

Administration is effectively made up of all of the non-specific activities that are required for the general function of Hawkes Bay Fish and Game Council. In determining the actual costs of output areas or projects, administration costs are apportioned at an hourly rate so that all input costs are shared between the projects.

Administration Project Clusters

Project and Objective				Performance measure
